

Metallurgical Research & Technology

Formerly *Revue de Métallurgie*

Revue de Métallurgie was founded in 1904 by the famous metallurgist Henry Le Chatelier. MRT is a peer-reviewed journal dedicated to ferrous and non-ferrous metallurgy.

It aims at making the bridge between research and technology and strengthening the dialogue between scientists and plant engineers.

The journal publishes articles on process developments, new products and experimental techniques; original research articles dealing with technical, industrial or scientific aspects, review articles (state of the art in a specific domain), technical and economic information and short communications.

Key Elements

Rigorous peer review

Strict ethical policies following the COPE code of conduct

Rapid publication: from acceptance to publication \approx 45 days

Author services: performant search engine, article metrics, bookmarking...

No page charges

Reader services: free e-mail alerts and RSS Feeds, CrossRef® and DOI

Editors-in-Chief

Robert Alberny
SF2M, Advisor

Jean-Marc Steller
ArcelorMittal Advisor
